Of Teacher's Education
(FOZ, C code)

Kishindi, Shivnagar Road,
Gopavaram

Subject name - Proficiency in English
By Sir - DEEPAK KUMAR (F-9)

Extensive and intensive Reading

Extensive Reading: Extensive reading involves learners reading texts for engagement and to develop general reading skills. It can be compared with intensive reading, which means reading in detail with specific learning, which means reading in detail with specific learning aims and tasks.

21

Example: A Teacher read a short story with learners, but does not set them any tasks except to read and listen.

Intensive reading: Intensive reading involves learners reading in detail with specific learning aims and tasks. It can be compared with extensive reading, which involves learners reading texts for enjoyment and to develop general reading skills.

Example: The learners read a short text and put events from it into chronological order.

Skimming and scanning are both skimming and scanning. readers are asked to process visual information quickly and also quickly determine essential versus nonessential information.

Skimming is a reading technique meant to look for main or general ideas in a text, without going into detailed or exhaustive reading. In skimming a reader reads only important information, but not everything. This technique works effectively in non-fiction materials, news papers and long novels.

Techniques for skimming using information

- ⇒ Read the introductory paragraphs
- ⇒ Read the first sentence of each body paragraph
- ⇒ And Read final paragraph.

Note: In simple word we can say that
एक अच्छा reader यह होता है जो उस story
की न वह उसे उसके main point को पढ़ता
है और वह ही उसका conclusion निकालता
है।)

Scanning is reading a text quickly in
order to find specific information, e.g.
figures or names. It can be contrasted
(किसी चीज) with skimming, which is reading
quickly to get a general idea of meaning.

Learners need to learn different
ways and understand that choosing
how to read is an important step in
building reading skills.

For example - A learner taking
a reading text needs to scan a text on
population rates quickly to find out if a
series of statements about the population
figures are true or false.

Note: ~~सिखने~~ सीखने वाले द्वारा अच्छा-अच्छा प्रकार
से किसी कथानी को सीखने की प्रक्रिया होती है
Learners need to learn different ways and
understand that choosing how to read is an
important step in building reading skills.
(उस पढ़ने के कौशल का निर्माण)।
